- Dilapidations & Leasehold Documentation
- Quality and Environment services

Company Profile

The Practice has almost 30 years experience, having been formed in October 1990 by Pat Connolly and Pat O'Brien. The company was passed to Daniel Ross in 2019, an employee of Consul Chartered Surveyors for 10 years where he proved to be a valuable asset to the company. Daniel then bought in Christopher Evans to partner the company with him in 2019.

The majority of our work is in the Public Sector for Local Authorities, Schools and Housing Associations. Where possible, we enter into partnering contracts, which are open book. This means any savings we can make, through the benefits of effective organisation and working can be shared amongst the team.

We are a friendly and efficient consultancy that strives to form excellent working relationships with all our Clients. This is demonstrated by the high level of repeat business we achieve and the number of new clients who come to us through recommendation
